INDEX FOR VOLUME 118

PAGE

Arason, J. & Magnus, R. The universal multiplicity theory for analytic operator-valued functions 315

Austin, D. M. & Braam, P. J. Equivariant homology 125

Bak, A. & Vavilov, N. Normality for elementary subgroup functors 35

Barrett, J. W. & Westbury, B. W. The equality of 3-manifold invariants 503

Benson, D. J., Carlson, J. F. & Rickard, J. Complexity and varieties for infinitely generated modules 223

Blache, R. An example concerning Alexeev's boundedness results on log surfaces . . . 65

Braam, P. J. & Austin, D. M. Equivariant homology 125

Bruce, J. W. Lines, circles, focal and symmetry sets 411

Bruns, W. & Herzog, J. On multigraded resolutions 245

Burns, D. On arithmetically realisable classes 383

Carlson, J. F., Rickard, J. & Benson, D. J. Complexity and varieties for infinitely generated modules 223

Casasayas, J., Llibre, J. & Nunes, A. Periodic orbits of transversal maps 161

Csörgö, S. & Viharos, L. On the asymptotic normality of Hill's estimator . . . 375

Cutler, C. D. Strong and weak duality principles for fractal dimension in Euclidean space 393

Dodds, P. G., Dodds, T. K., Dowling, P. N., Lennard, C. J. & Sukochev, F. A. A uniform Kadec–Klee property for symmetric operator spaces 487

Dodds, T. K., Dowling, P. N., Lennard, C. J., Sukochev, F. A. & Dodds, P. G. A uniform Kadec–Klee property for symmetric operator spaces 487

Dowling, P. N., Lennard, C. J., Sukochev, F. A., Dodds, P. G. & Dodds, T. K. A uniform Kadec–Klee property for symmetric operator spaces 487

Duffield, N. G. & O'Connell, N. Large deviations and overflow probabilities for the general single-server queue, with applications 363

Elvira-Donazar, C. & Hernandez-Paricio, L.-J. Closed model categories for the n-type of spaces and simplicial sets 93

Grandis, M. Homotopical algebra and triangulated categories 259

Harman, G. Numbers badly approximable by fractions with prime denominator . . . 1

Hernandez-Paricio, L.-J. & Elvira-Donazar, C. Closed model categories for the n-type of spaces and simplicial sets 93

Herzog, J. & Bruns, W. On multigraded resolutions 245

Hofmann, K. H., Morris, S. A., Oates-Williams, S. & Obraztsov, V. N. Locally compact groups with closed subgroups open and p-adic 303

Kooij, R. E. Cubic systems with four real line invariants 7

Kratz, W. An oscillation theorem for self-adjoint differential systems and an index result for corresponding Riccati matrix differential equations 351

Kuijlaars, A. B. J. & Saff, E. B. Asymptotic distribution of the zeros of Faber polynomials 437

Lehrer, G. I. A toral configuration space and regular semisimple conjugacy classes . . 105

Lennard, C. J., Sukochev, F. A., Dodds, P. G., Dodds, T. K. & Dowling, P. N. A uniform Kadec–Klee property for symmetric operator spaces 487

Letherman, S. D. & Wood, R. M. W. A note on the Julia set of a rational function. . 477

Leung, D. H. Some stability properties of C_o-saturated spaces 287

Li, G.-S. Oriented bordism groups of immersions. 467

Lichtman, A. I. Algebraic elements in matrix ring over division algebras 215
Llibre, J., Nunes, A. & Casasayas, J. Periodic orbits of transversal maps 161
Lyzzaik, A. Covering properties of open continuous mappings having two valences between Riemann surfaces 321
Magnus, R. & Arason, J. The universal multiplicity theory for analytic operator-valued functions. 315
Menth, M. A family of Fitting classes of supersoluble groups 49
Merkulov, S. A. Moduli spaces of compact complex submanifolds of complex fibered manifolds 71
Merriman, J. R. & Smart, N. P. Curves of genus 2 with good reduction away from 2 with a rational Weierstrass point (Corrigenda) 189
Montgomery, H. L., Vaughan, R. C. & Wooley, T. D. Some remarks on Gauss sums associated with kth powers 21
Morris, S. A., Oates-Williams, S., Obraztsov, V. N. & Hofmann, K. H. Locally compact groups with closed subgroups open and p-adic 303
Müller, E. F. Differential fields and differentiable functions of algebraic numbers . . 341
Nunes, A., Casasayas, J. & Llibre, J. Periodic orbits of transversal maps 161
O'Connell, N. & Duffield, N. G. Large deviations and overflow probabilities for the general single-server queue, with applications 363
Oates-Williams, S., Obraztsov, V. N., Hofmann, K. H. & Morris, S. A. Locally compact groups with closed subgroups open and p-adic 303
Obraztsov, V. N., Hofmann, K. H., Morris, S. A. & Oates-Williams, S. Locally compact groups with closed subgroups open and p-adic 303
Offord, A. C. The distribution of the values of an entire function whose coefficients are independent random variables (II). 527
Popov, I. Yu. The operator extension theory, semitransparent surface and short range potential. 555
Rendall, A. D. Global properties of locally spatially homogeneous cosmological models with matter 511
Rickard, J., Benson, D. J. & Carlson, J. F. Complexity and varieties for infinitely generated modules 223
Robinson, P. L. Fermionic Gaussians 543
Saff, E. B. & Kuijlaars, A. B. J. Asymptotic distribution of the zeros of Faber polynomials 437
Seeger, A., Wainger, S. & Wright, J. Pointwise convergence of spherical means . . 115
Shirvani, M. The finite inner automorphism groups of division rings 207
Smart, N. P. & Merriman, J. R. Curves of genus 2 with good reduction away from 2 with a rational Weierstrass point (Corrigenda) 189
Soma, T. A rigidity theorem for Haken manifolds 141
Stöhr, R. Symmetric powers, metabelian Lie powers and torsion in groups. 449
Sukochev, F. A., Dodds, P. G., Dodds, T. K., Dowling, P. N. & Lennard, C. J. A uniform Kadec–Klee property for symmetric operator spaces 487
Trofimov, V. I. & Weiss, R. M. Graphs with a locally linear group of automorphisms . 191
Vaughan, R. C., Wooley, T. D. & Montgomery, H. L. Some remarks on Gauss sums associated with kth powers 21
Vavilov, N. & Bak, A. Normality for elementary subgroup functors 35
Viharos, L. & Csörgö, S. On the asymptotic normality of Hill's estimator . . . 375
Wainger, S., Wright, J. & Seeger, A. Pointwise convergence of spherical means . . 115
Weiss, R. M. & Trofimov, V. I. Graphs with a locally linear group of automorphisms . 191
Westbury, B. W. & Barrett, J. W. The equality of 3-manifold invariants 503
Wood, R. M. W. & Letherman, S. D. A note on the Julia set of a rational function. . 477

Wooley, T. D., Montgomery, H. L. & Vaughan, R. C. Some remarks on Gauss sums associated with kth powers 21

Wright, J., Seeger, A. & Wainger, S. Pointwise convergence of spherical means . . 115

Xu, L. On a conjecture of Smith's 59

Zhang, Q. A remark on elementary contractions 183
